Art Unit: 1745

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 25-34, 36-40, 50-65 are rejected under 35 U.S.C. 102(e) as being anticipated by Fukuda et al.-US 6,001,505 ('505) (New Rejection with regard to claims 50-65)

Reference is made to Figures 1-3 of '505 along with column 4, lines 4-40, column 5, lines 47-51 and column 7, line 18 through column 9, line 67. The '505 patent discloses the dual insulating layer around each of the external terminals of the non-aqueous battery. In addition, the '505 patent teaches the claimed "single laminate film" as claim 51 recites because the battery case is one integral film layer.

Applicant's arguments regarding the above rejection have all been considered but are not deemed persuasive. Applicant argues that '505 does not teach the sealant resin being of a length greater than a thickness of the battery case. The examiner respectfully disagrees. With regard to Figures 2 and 3, it can be seen that the length of the sealant resin layer 42 a(b) is longer than the width of the battery case. Viewing both Figures 2 and 3, it can be seen that the length of 42a(b) is a greater length than a thickness of the battery case. This thickness is the length of the battery case at the most bottom portion of the case as seen in each drawing figures. The claimed subject matter is thus met by '505.

3. Claims 25-28, 36-40, 50-54, 61, 63-65 are rejected under 35 U.S.C. 102(e) as being anticipated by Fukuda et al.-US 6,004,693 ('693) (New rejection with regard to claims 50-54, 61 and 63-65)

See column 2, lines 54-68, column 4, lines 54-63 of '693 and column 7, lines 33-45 along with all of the drawing figures therein. The '693 patent sets forth the insulating layer around each of the battery terminals.

Again, all of applicant's arguments have been considered but are not persuasive. The arguments set forth by the examiner in refuting applicant's arguments based on '505 in the previous section apply equally to the arguments set forth by the applicant in relation to the '693 patent noting that the length of the sealant resin 16a(b) as seen in both Figures 2 and 3 is longer than a thickness of the battery case. This thickness is the length of the battery case at the most bottom portion of the case as seen in each drawing figures. The claimed subject matter is thus met by '693.

4. Claims 25-28, 36, 50-54 and 61 are rejected under 35 U.S.C. 102(b) as being anticipated by Koike et al-US 4,664,994. (Koike) (New Rejection)

Reference is made to Figures 2-4 of Koike along with column 4, lines 23-35 and column 5, lines 8-65.

No rebuttal of arguments relating to the Koike patent are required because this is the first rejection against the claims by Koike.

5. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 09/582,752

Art Unit: 1745

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
